TIME FOR ANC GOVERNMENT TO GO

Cyril Ramaphosa recently addressed the people of South Africa. He spoke about the devastating floods in KZN and offered his condolences to those who had lost family members, friends and homes. He pledged government support and aid relief to those who now have to rebuild their homes and lives. He assured the country that the aid would reach those for whom it was intended.

Barely ten days later, an ENCA news headlines read, "Complaints of aid being pocketed."

The ANC government, giving us these assurances of transparency, is the same one that, for almost thirty years, has been looting the countries coffers. Taking the citizens' hard-earned cash through excessive taxation and spending it on their lavish lifestyles.

Most of those in government, their families and friends, are guilty of inappropriately enriching themselves. Yet they carry on as if everything is normal and above board and "there is nothing to see here". Much like Joe Biden and his son Hunter in America.

These people have proven, over and over again, that they cannot be trusted. They have lied to the people of South Africa for decades, making empty campaign promises, promising the world and not delivering anything.

We have not forgotten the Guptas, the five hundred billion and how much of that disappeared, neither the exorbitant price of petrol, which has less to do with the price of crude oil and more to do with government taxation. More perplexing than all this, is the ever-increasing erosion of our Constitutional rights and liberties.

As with some people everything they touch turns to gold, it would appear that everything the ANC government touches turns to ashes.

Their close relationship with the World Health Organisation, Chinese Communist government, and those involved in the world economic forum and new world order, is also a matter of great concern.

It is time for them to go!
